

Veterinary Foundations of Infection Prevention and Control

**NEW
IN 2024**

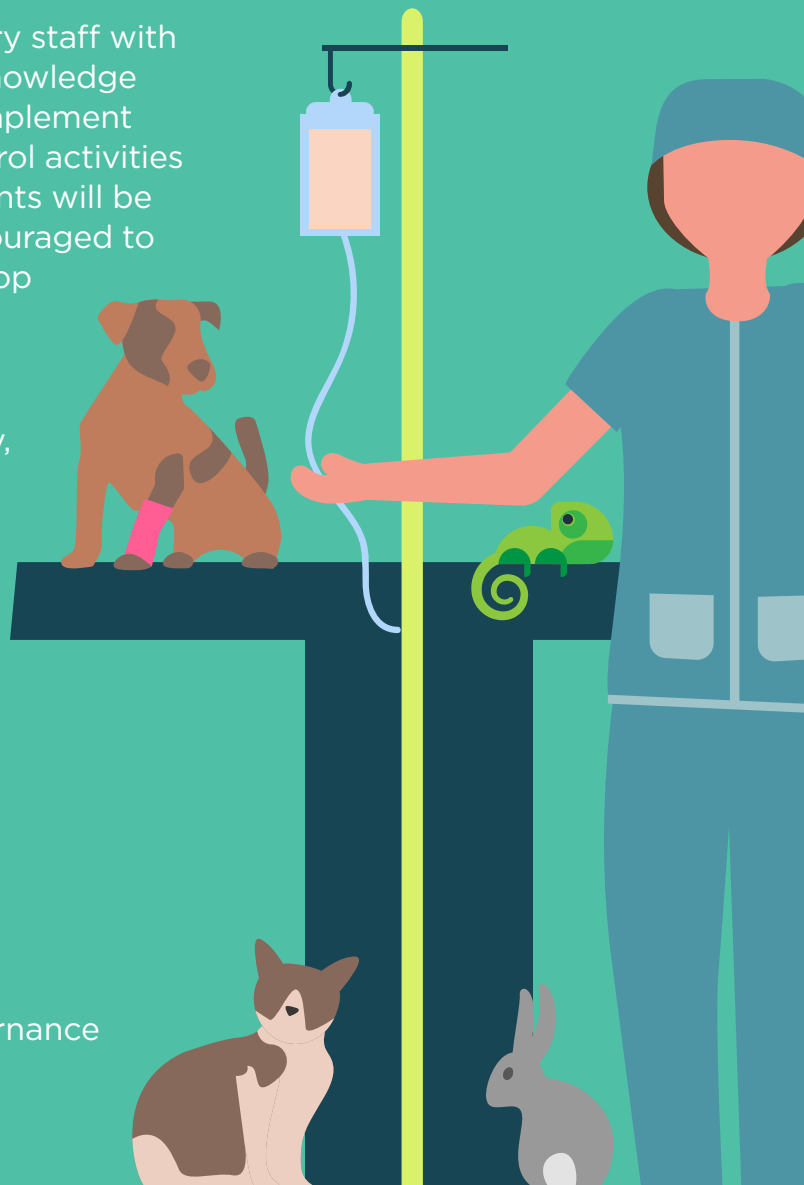

This online course has been designed for veterinary staff (veterinarians, veterinary nurses, veterinary technicians) working in all veterinary settings. It runs over 24 weeks.

WHO IS THE COURSE FOR?

The course is designed to provide veterinary staff with a broad understanding and introductory knowledge and skills to enable them to assess, plan, implement and evaluate infection prevention and control activities within their veterinary workplace. Participants will be supported throughout the course and encouraged to interact via the Moodle platform and develop a veterinary IPC network.

LEARNING MODULES:

- ✓ Microbiology, virology and immunology, One Health
- ✓ Standard and transmission-based precautions
- ✓ Management of the environment and equipment
- ✓ Healthcare-associated infections
- ✓ Multi-resistant organisms and antimicrobial stewardship
- ✓ Aseptic technique and invasive devices
- ✓ Outbreak management
- ✓ Audit and surveillance
- ✓ Workplace health and safety, and governance
- ✓ Developing an IPC program/plan
- ✓ IPC considerations in specific settings
